

Specialty Coding Professional – General Surgery (SCP-GS)

As a service to candidates, this outline is designed to provide a representative example of the coding and billing issues covered on the SCP-GS examination. While it should serve as a guide for test preparation, it should not be considered inclusive of every issue addressed within the examination.

Examination Outline

Medical Terminology

- Common General Surgery terminology (i.e. sentinel node, fistula, hemicolectomy)
- Anatomy (i.e. anatomy of the breast, stomach, bowels)

Evaluation and Management Coding (ICD-9-CM and CPT)

- E/M services in two different sites/same day (Medicare rules)
- Observation service codes
- Types of consultation services
- Postoperative E/M services
- Scenario-based E/M ICD-9-CM
- Referrals
- 1995 and 1997 documentation guidelines for physical examination
- E/M and minor procedure same day
- Critical
-

Surgery Coding (ICD-9-CM, CPT and HCPCS)

- Central venous catheter placement
- Wound repairs
- Breast procedures
- Thyroid procedures
- Needle localization of the breast
- Excision of lesion (e.g. neck)
- Hernia procedures
- Laparoscopy procedures
- Dialysis fistula procedures
- Hemorrhoid procedures
- Colectomy procedures
- Amputations

Modifiers (combined with coding scenarios throughout the exam)

- -59
- -23
- -57
- -24 and -25
- -78
- Global surgery modifiers -54, -55, -56

HCPCS, Coding and Billing Rules and Medical Terminology and Anatomy (combined with coding scenarios throughout the exam)

- Level II modifiers
- G codes
- Neoplasm Table
- Infections and complications
- Digestive system
- ABN
- Claim filing deadlines
- Category III codes
- HIPAA
